PROBLEM STATEMENT

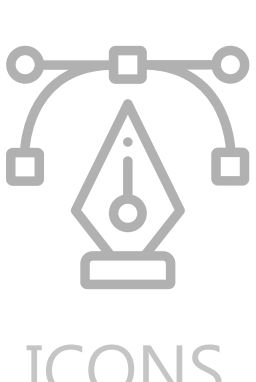

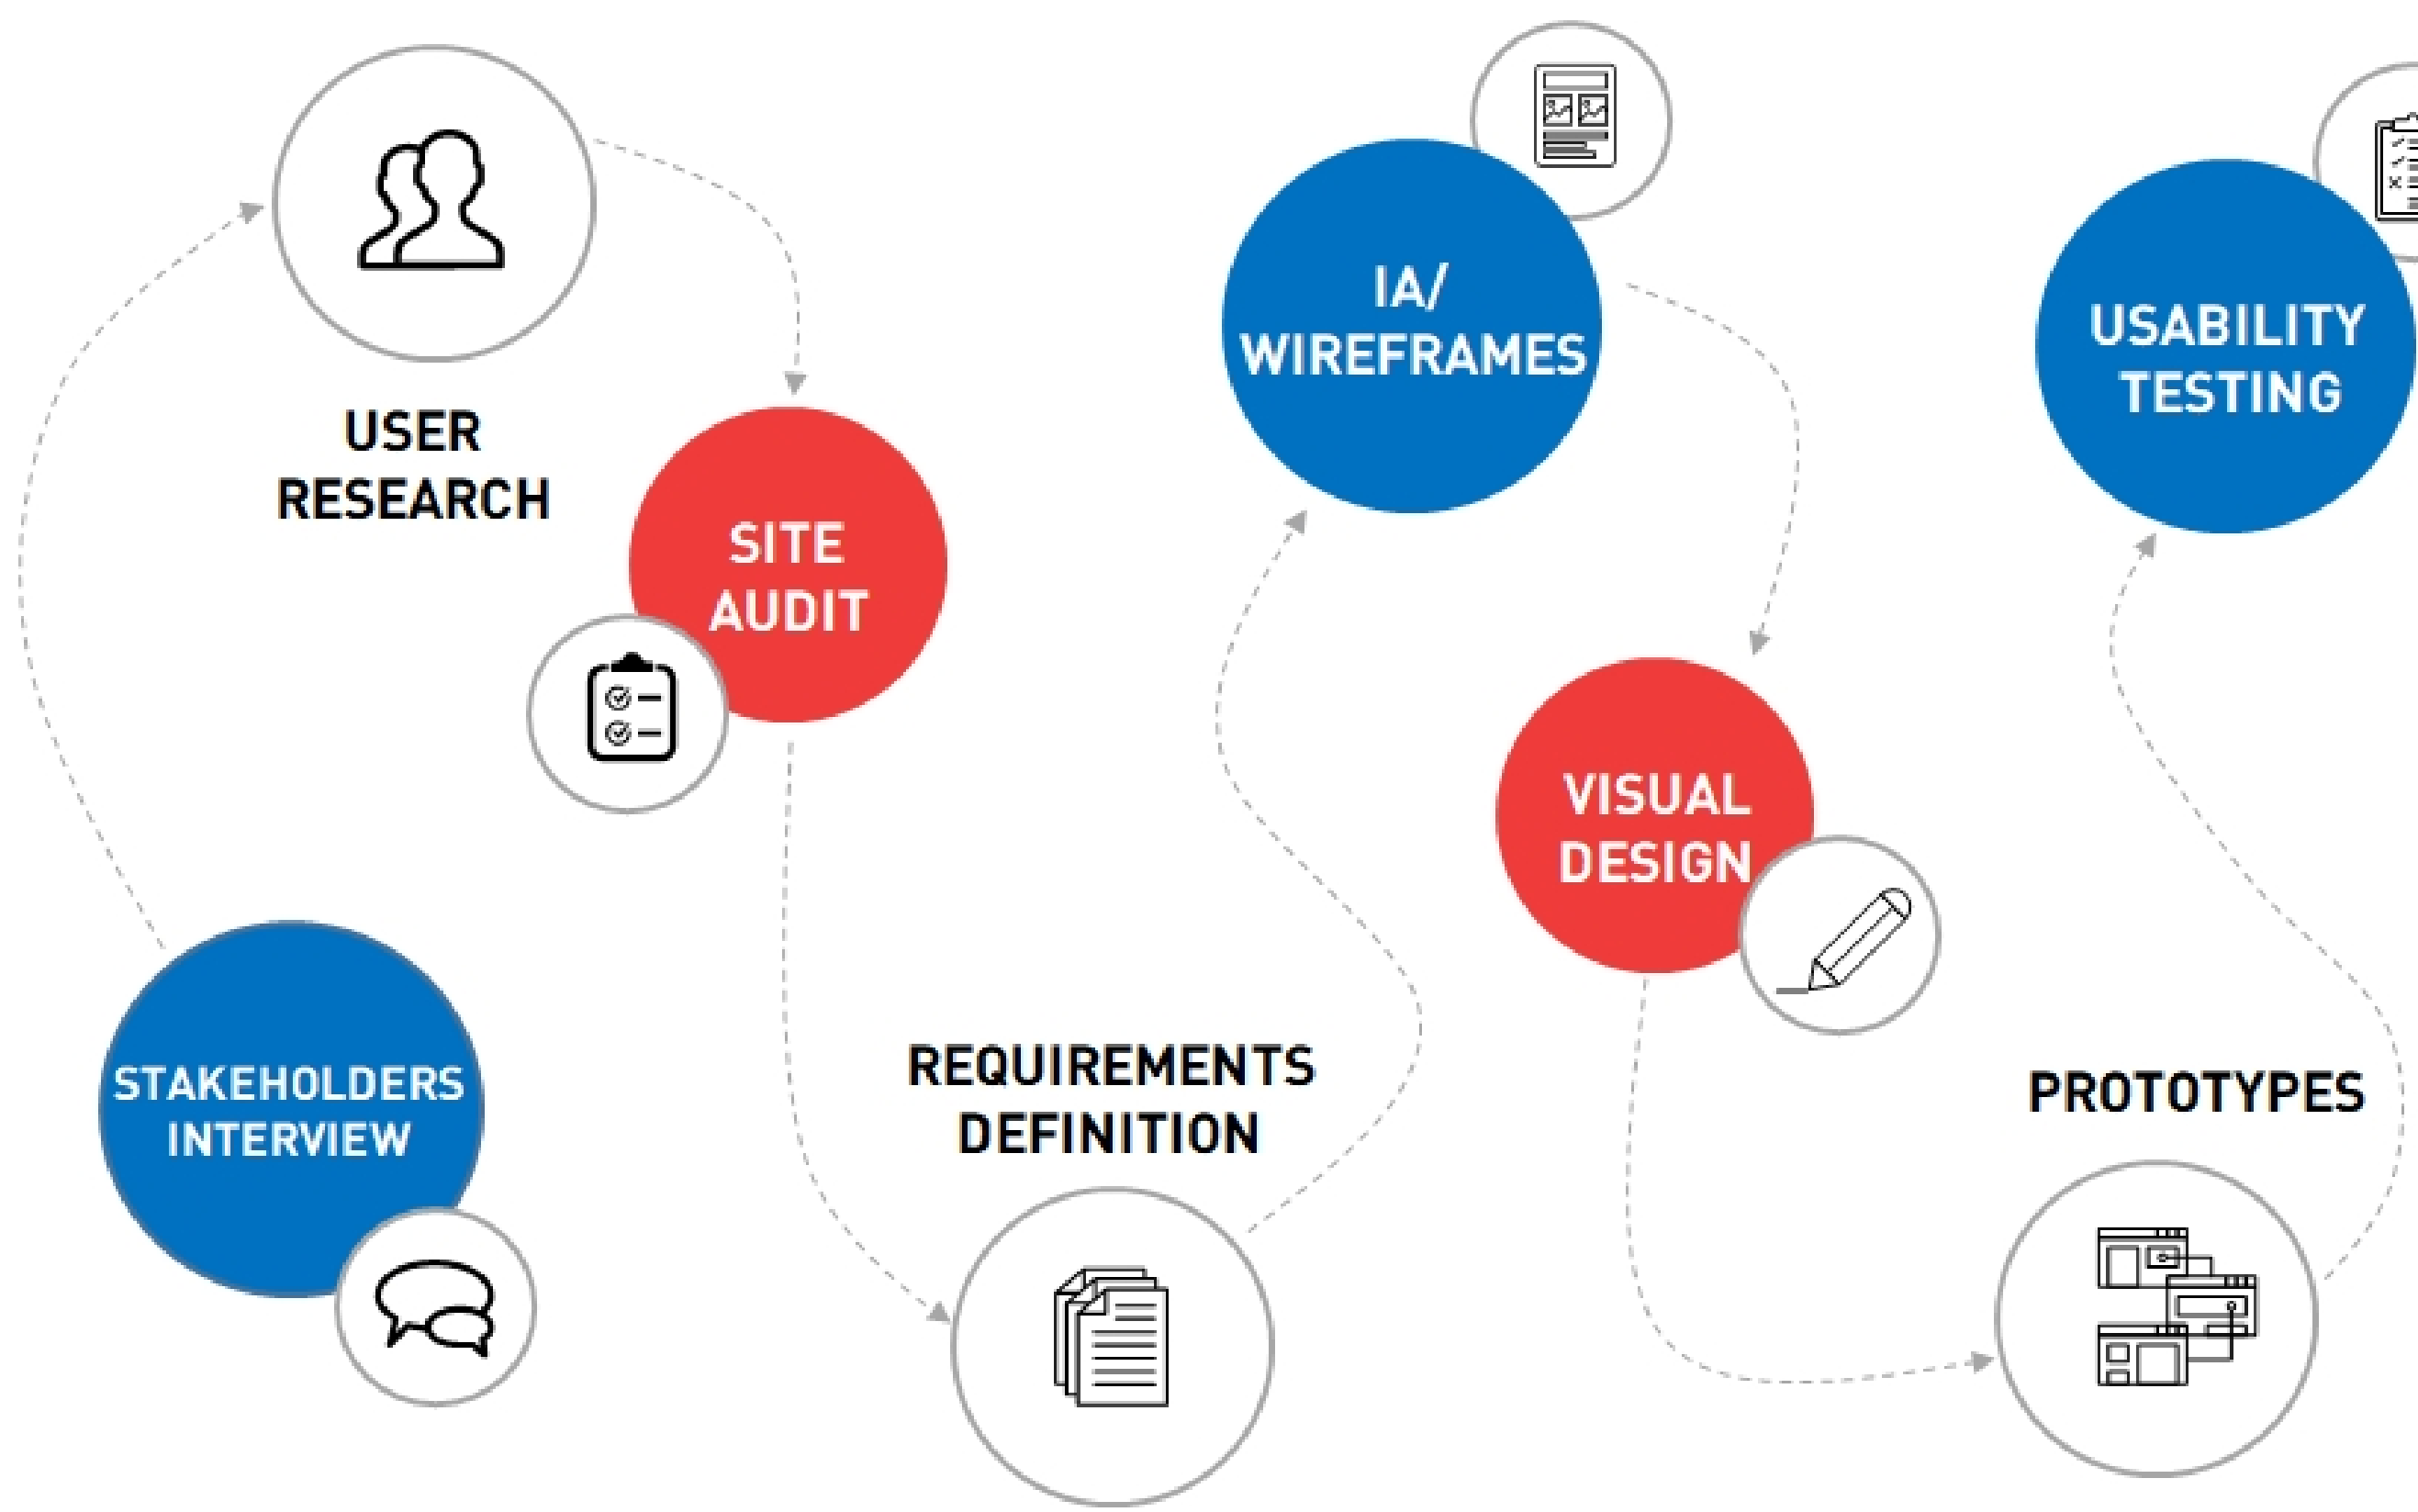

PROBLEM STATEMENT

Finding a home-cooked meal is always been difficult for bachelors and students who stay away from their homes. To deliver home-like meal at a reasonable rate our client wanted to develop a food delivery app with elegant UI and hassle-free User Experience.

The challenge we faced while designing is to get into the end user's perspective and design the application for the targeted audience. The client wanted the application to have a homely presence to it which would reflect their motto 'Ghar Ka Khana'.
